

THE GLEICHEN CALL

VOLUME XXXIV NO. 30

GLEICHEN, ALBERTA, WEDNESDAY OCTOBER 8, 1941

SUBSCRIPTION \$2.00 PER YEAR

PLAN AIRGRAPH SYSTEM FOR LETTERS OVERSEAS

With a view to speeding up the delivery of letters from relatives and friends in the United Kingdom, Hon. William F. Mulock, K.C., M.P., Postmaster General stated that arrangements are now underway for the installation of a time-and space-conserving Airgra-h Service between this country and the United Kingdom. He pointed out that the system is doing everything possible to facilitate the transmission of mails for our forces with a minimum of loss and delay. Hon. Mr. Mulock is planning to institute this special system at an early date. Following completion of arrangements now under way, a definite announcement will be made by Hon. Mr. Mulock as to the date of commencement.

Under this special system the sender of an Airgraph communication writes the message and address on a special form provided by the post office. The completed form is next photographed on miniature film which is dispatched by the post office in the United Kingdom photographic enlargements are made and delivered through the Army Post Office to the troops in the usual way. The rate on the Airgraph message will be ten cents.

THE WEEK IN EDMONTON

Stating that about half of the British children now guests of Canadian families wish to remain in Canada after the war Geoffrey W. Brown, M.P., now touring the Dominion, declares that the British child placement plan is part of a wider policy of Empire settlement to be followed after peace is declared. In Edmonton, Mr. Shakespeare conferred with officials of the Child Welfare Bureau, who are concerned with the welfare of child guests.

Hon. D. Bruce MacMillan, minister of agriculture, has announced promotion of W. H. T. Mead, Camrose district agriculturalist, to the position of live stock promoter for the province. Mr. Mead will act directly under A. A. Campbell, the live stock commissioner. Graduate of the Alberta University the new promoter has served at Berwyn, Vermilion and Olds. J. L. Kerna of the crop branch will fill the Camrose vacancy.

Representatives of Canada's growing mining industry, more than 100 men from all parts of the Dominion gathered in Edmonton for the three day sessions of the Canadian Institute of Mining and Metallurgy. Delegates were welcomed by Hon. N. E. Tanner, mines minister for the province, and by the mayor of Edmonton and Prof. W. G. McBride, president of the Institute. One topic of prime importance to the province was broached when Howard Stubbey of Edmonton, spoke on "Ontario as a possible market for Alberta coal." This address was timely since the provincial government is at present conducting an advertising and promotional campaign in an attempt to enhance the western market.

With plentiful supplies of bird game filling the bags of hunters in many parts of the province the three day and partridge season has opened auspiciously. Reports from the "thrush" country adjacent to Jasper are "first" and indicate that the season is "thriving" this year too. Nevertheless, conservationists are adhering to that age-old rule of dogged verve which runs:

He who hunts and kills will not fall; But he who kills all that he can Is neither sport nor gentleman.

Paying of a monthly bonus to old age pensioners would cost taxpayers another \$648,200 yearly, it was estimated after Fred Anderson, M.L.A., was reported to have announced his intention to introduce a bonus resolution at the next legislative session. Under the Dominion old age pensioners must not have a separate income of more than \$125 a year if they are to receive the full \$20 pension. Persons with incomes equal to \$125 a year get no pension. At present there are 10-70 pensioners in Alberta.

Alberta's labor legislation ranks among the best in Canada, it was declared in Edmonton by A. R. Johnson, vice-president of the Interna-

BRITAIN'S SEA-GOING SAILORS—The training of the British Royal Marines is a dual one for these troops have duties both afloat and on shore. Marines in training are seen storming a beach with a bayonet charge.

News Items of Local Interest

Hunters state that there are more geese than there have been for many years for the past thirty years. Auctioneer G. Allen will offer the household effects of Mrs. J. H. Wright for sale on Thursday afternoon, Oct. 11, at 2 p.m. The sale will take place at Mrs. Wright's residence.

L. Nicholson, formerly manager of the Royal Bank here but now occupying the same position in the bank at Three Hills, spent a day in town last week looking after his property.

R. S. Hasky of the Pon or Meat Market has been in Calgary for more than a week on jury duty. Bob doesn't care very much for the job and would rather be at home behind his counter.

Sgt. E. Lester arrived home last week from Debuti, N.S., where he has been a resident for many months. Eugene has been on the sick list for sometime and has been transferred to Calgary.

Graham Maclean, son of Peter and late Mrs. Maclean of Vancouver, formerly of Gleichen, passed through town last week on board a troop train from the coast. Graham recognized some of his old school chums on the platform and jumped off to shake hands.

G. Webb aged 83 years died at Everdale Home last week after he had been a resident for over two years. Deceased was born in England and came to Alberta in 1894 making Bowden his home. He is survived by a son living at Bowden. Funeral services were conducted by Major J. Sutherland after which interment was made in Everdale cemetery.

Located in Winnipeg, flew over town last week. The plane was on its way for Calgary at short intervals four other bombers passed over bound for the same city. That evening it came to town by train en route to Winnipeg and will likely fly west with more bombers.

After spending a couple of weeks on furlough with his parents Corb. D. Woods, R.C.A.F., left Saturday night for Winnipeg, where he will continue his duties as instructor. While here D. went goose hunting for the first time in his life. The first time he was out he had only three birds of ammunition but he was successful beyond his wildest dreams.

He and he succeeded in knocking down two with one shot. One bird he promptly got and while chasing the other over the prairie he heard another flock coming and stopped to do some more shooting. The geese began to come over on wave rows, geese by the thousand. He shot a raven out of ammunition. He thought this was more exciting than his first airplane ride. After the excitement was all over he spent an hour looking for the geese he had been shooting over the prairie with out success and couldn't help the old saying "a bird in the hand is worth two on the prairie". However, Denny and he were with two geese which was the main thing.

This week is Fire Prevention Week. National Union of Food and Restaurant Employees. He is to address meetings in the city October 12 and 13.

and everybody should be sure to inspect their properties to prevent the possibility of fire later on. The government of Canada and underwriters associations have combined to bring long to the public of fire, the waste of time and materials that result from it, the tragic loss of life, above all, the fact that most of this need not be if we were to be ever watchful to overcome the old, old human fallacy—carelessness. Fires throughout the province last year totaled 1,841, amounting to 1,517 in 1939; property loss \$1,655,917 as compared with \$1,148,411 in 1939; the past year loss in 1940 was \$1,633,459 or \$2.18 per head of population. Homes were the scene of most of the outbreaks from coast to coast. In all there were 33,295 residential property losses out of a grand total of \$4,609,199 for the Dominion.

Found guilty by a criminal assizes jury of having administered poison to his wife with intent to "injure, aggravate or annoy" Vincent Chartrand, formerly of Gleichen district but for sometime living in Calgary, was sentenced to 18 months in Lethbridge jail by Mr. Justice G. B. O'Connor.

Mr. McCaffrey, defence counsel stated the conviction and sentence will be appealed to the Alberta Appeal Court. Chartrand was acquitted by the jury on a charge of attempted murder but was convicted on the lesser count after deliberation of approximately an hour. The Crown contended Chartrand put strychnine in Mrs. Chartrand's coffee. The motive, allegedly, was her refusal to give him a divorce and his desire to marry Alma Martens, former maid in the Chartrand home.

COMING EVENTS

Oct. 10—Red Cross dance at Meadowbrook Hall, sponsored by ladies of U.F.W. Music by Cordick Family, a seven piece orchestra.

TRUTH DON'T ALWAYS SUIT

A great many impractical people try to figure out what would happen if everybody told the exact truth. There is a saying that the truth never hurt anybody, but people are not so fond of the truth as they might be expected. The category of white lies is a very large section in some people's minds and is said to be particularly useful in society and business.

On the other hand there are people so particular about the truth that they strain a point. A young man attempted to apply exact truth to a wedding notice. After giving the names of the parties it continued: "The church was decorated with flowers and plants, borrowed promiscuously from over town from people who didn't want to lend them. The decorating was done under protest by some of the members of the church who were asked to do so by the bride and couldn't well refuse. The ladies are of the opinion that if the couple were so bent on having a simple wedding they should have been willing to have paid somebody to chase all over town for a day getting the flowers together and then taking

YOUTH TRAINING CLASSES FOR SEASON HAVE COMMENCED

The ladies of the Youth Training Class held their first meeting of the season last Friday, the excellent attendance forecasting much enjoyment for the group this winter. Classes will be held Monday and Friday. The latter being a mixed class, with ladies coming from 7.30 till 9 p.m., and the men from 8.30 till 10 p.m. Monday night is for ladies only, the class commencing at 8 o'clock. A dance has been planned for Tuesday night Oct. 17, in the P. T. hall, proceeds to go for re-wiring the hall. Later in the season the group hope to present a play, to pay for coal. Three acts this time—three times as much fun as last year's!

Everyone is welcome to join this Youth Training Group—it doesn't cost a penny and it's a better tonic than Vitamin B!

SEEDTIME AND HARVEST

Dr. K. W. Newby
Director, Agricultural Department
North-West Live Elevator Association

"Going Back"—The belief that varieties of wheat and other crops deteriorate, or "go back," is a common one. It is probably quite old; indeed, it may trace back to Charles Darwin's conviction that "nature abhors self-fertilization." Thus in the early years of the present century we witnessed efforts to rejuvenate Red Fife and Marquis by crossing different crops of the same variety. This resulted in "rejuvenated" Red Fife, or "rejuvenated" Marquis; but there was never a shadow of evidence that the rejuvenated strains were any more productive than the originals.

The "going back" idea may be strengthened by the knowledge that the growth of hybrid vigor must renew their seed each year. However, the situation with cross-fertilized crops such as corn is quite different from that with crops mainly self-fertilized, such as wheat, oats and barley.

The fact that Thatcher wheat suffered from test rust this year has led many people to believe that its rust resistance is weakening. This is emphatically not so. Test rust and other rusts are caused by two quite different fungi. Thatcher has always been susceptible to test rust and it is not surprising to suggest that it is less resistant to stem rust than it was ten years ago.

Deterioration in farm stocks of wheat is due to volunteering of other varieties in the year, rather than earlier, to mechanical mixing in machinery or granaries, to livestock contamination or to plant diseases and to occasional natural crossing with other nearby varieties.

The occurrence of epidemics in other nearby varieties is considered an example of deterioration through natural selection. It is not a large self-eliminating.

(To be continued)

them home again. The couple left for Banff where they will spend more money in a few days than Willie can earn in three months. Willie says that he is married he's going to settle down. Some of the merchants think it would have been better if he had settled up. The groom gets a very small salary about the size of the allowance Betty has been used to for pin money. We wish for Willie sake that the old saying that it takes no more to support two than one wasn't a lie.

It is unnecessary to say that the consequences were lamentable, but the foregoing is evidence that the parts a paper leaves out of many items shows more wisdom than those published.

Sacrifices Here And There

The Canadian national income for the fiscal year ending March 31, 1942 has been officially estimated at \$5,900,000,000, close enough to call it six billion dollars. During the same fiscal year, the people of this country will make a direct contribution towards the war effort of an estimated \$1,450,000,000 and an indirect contribution of \$1,150,000,000 representing Great Britain's estimated deficit on her account for war materials supplied by this country to her during the same period.

A little mental arithmetic shows that these combined contributions of the people of this country towards smashing Nazism during the current fiscal year will cost the people of this country approximately 44 per cent. of the Canadian national income.

When to this is added the very substantial sums that have been contributed and one can be sure that the war appropriations bill, "without boasting and without vainglory, we may all take pride in the vision, the unity, the resolution and the achievement of the Canadian people."

Yes, that is quite an achievement and entails considerable sacrifices, sacrifices which the people of Canada are quite willing to make to ensure that ultimately right shall prevail over might, and there is no guarantee that Canadians may have to make even greater sacrifices than payment of 44 per cent. of the national income before the goal is finally reached.

In Great Britain

After all, when one compares the lot of the average Canadian with that of his relatives and friends who are bearing the brunt of the shock of battle in Great Britain, a contribution of 44 per cent. of the national income is not excessive.

Despite this contribution, it is a fair assumption that practically every resident of this country will, during the fiscal year 1941-42, enjoy three hearty, square meals a day with a free range choice of diet, not only in quantity but in variety; that every Canadian will be able to enjoy a good night's sleep every night throughout the year, without fear of being crushed to death with the collapse of his house under a rain of bombs; that no Canadian will suffer from exposure for lack of sufficient clothing to keep him warm.

In the Motherland, on the other hand, not only are the people willingly and cheerfully devoting one half of their income to the prosecution of the war, but they are suffering dietary inconveniences which the well fed Canadian would find irksome, to say the least. They are eating on reduced rations of meat to conserve space in ocean bottoms for much needed war materials. Consumption of butter has been very sharply and the use of some other food commodities has been materially curtailed or has disappeared entirely. On top of that, they never know when they retire for the night whether they will live to see another day.

If in these respects the Canadian is better off than his friends and allies in the United Kingdom, his lot is infinitely superior, more tolerable and more enjoyable than that of the freedom-loving peoples of other European countries, now under the grinding heel of the ruthless Nazi conqueror.

And In Norway

In illustration one has only to cite the predicament in which the people of Norway find themselves after one year of Hitler's rule. In that country where conditions are not yet as harsh as in Poland, a huge army of occupation, estimated at 300,000 men, continue to requisition meat, eggs and other foods, and the Norwegian people have been reduced to a state of starvation. In Great Britain from friends in Norway states that "meat can scarcely be found anywhere, and even farmers who have pigs are not allowed to use them for their own families." Bread is made with so many ingredients that it tastes like cardboard, "as for real food, that can be bought in the stores."

In northern Norway where fish is the staple support of the population, fishermen cannot get gasoline for their boats and the country's supply of dried stock fish, 7,000 tons, has been seized while all domestic sales of klupfish have been stopped. Germany wants klupfish to use in bartering for products needed by the Reich, so they have demanded 10,000 tons for themselves and 9,000 tons for Italy, despite the fact that Norway's entire supply of klupfish is only 13,000 tons.

An inkling of the clothing situation in Norway is given by the author of another letter received from Great Britain in which the writer says "You can't think of buying anything without a ration card, not even thread, yarn or a tiny piece of cloth. We get 300 coupons per year in our card, but a dress requires 150 coupons and a little yarn 30 coupons. Men can 'buy' only one suit or overcoat a year. I am in despair when I think how many coupons it takes just to buy stockings for the boys."

It is well that fortunate Canadians who are asked to contribute 44 per cent. of the national income to "fight the good fight" should think of the plight of their people in other lands, when they open their purse strings.

Sea, Water Harvest

A person's health at sea will live longer by taking no water at all than by drinking sea water. Sea water is so salty that, while the kidneys are eliminating the excess salt, water from the blood plasma is lost, thus hastening death.

An Efficient Dentist

Tiny parasites get into the mouths of fish and annoy them. The tiny parasites feed within into the mouths of these larger fish to remove the parasites while the "patient" holds perfectly still.

More than 4,000 earthquakes, causing the death toll of a million persons, have occurred since this Christian era began.

DAILY MAIL CIGARETTES

Roads With Royalty

John Rutherford, royal engineer on Revelstoke, B.C. divisions as the "royal" engineer who shared his cake with the King and Queen on May 28, 1939, made his last run on Sunday, March 30, climaxed a 45-year railway career, starting in Scotland with the Caledonian railway and ending, since 1903, to the Canadian Pacific Railway at Revelstoke.

For A People At War

"Out of the gloom of the anomalies and paradoxes of the world situation there have shone several guiding beacons. The people of England head the list with their tenacity and courage, inspired no doubt by the retirement through Dunkirk."—Hon. Thane Campbell, premier of Prince Edward Island.

Amazon flies, used to combat the sugar-cane borer, have been flown by air express from the upper Amazon River to the West Indies.

A toad may live a year without food.

Consider It Hard Luck

But Canadians Long Wait For Action Means Greater Efficiency

Canadian troops "with ordinary luck" would have been in action against the enemy before the Austrians, McGlen, R. J. Collins said in a broadcast from London.

After relating what "this long weary waiting for a fight" meant to the Canadians, McGlen, Collins said that "with ordinary luck they should have been sure of getting going before the Austrians... instead of which the Austrians finished one of the most successful campaigns before the Canadian even had a chance to show their teeth."

The brief notice into France without contacting the enemy "only made it worse," he said. "All the same I'm sure they'd agree, if you ask them, that they are 100 per cent. more fit today on the Hun than they were when they landed... Under Lt.-General McNaughton's inspiring leadership they have made great progress."

Large Outlays

Canadian Red Cross Has Spent \$120,371.00 For Comfort Of Fighting Forces

For the aid of men of the British and other numerous members of the merchant marine in and out of very busy eastern seaports of Canada, the Canadian Red Cross has spent of 1939 and 1940 campaigns has made a host of large outlays.

For a total of 750 beds requiring extensive furnishing and now operated by the Y.M.C.A. for the entire army of an army home of 250 beds now conducted by the Salvation Army and for another 250 beds for the Knights of Columbus, a total of \$60,000 was spent. For these institutions so much needed by the men money had to be found quickly. The Red Cross was very glad to make the foundation investments so that other organizations might have the operation of them, and as they were not continued.

Extensive Navy stores elsewhere in Canada, requiring rebuilding of premises, enlargement and furnishing, a further \$20,000 was spent in a time when the Red Cross, in addition, for supplies for these institutions, camp clothing for the men in cold weather, and the hospital equipment and garments required in naval hospitals. The total value of the \$40,371 were supplied at a time when they were immediately needed and no other source could provide them in such ready and large quantities.

There has therefore been a total of \$120,371 for these purposes. At a meeting of early April the Red Cross decided to meet very serious need for a new canteen and recreation building in Halifax for the men of all sea services. As they required \$20,000, this amount was readily voted.

Despite His Handicap

Lord Halifax Takes An Active Part In Various Sports

Lord Halifax's grandfather was a Chancellor of the Exchequer and married a daughter of a Premier, and his father became the recognized leader of the High Anglican.

Like the ex-Kaiser, Lord Halifax, now British ambassador to the United States, has a withered left arm. Nevertheless he acted for a time as colonel of the Yorkshire Dragoons, and hunts and plays tennis despite this handicap.—News of the World.

Young Home Guards

A 14-year-old youth of Edinburgh, Scotland, claims he is the youngest member of the Home Guard in Great Britain, refuting similar claims of two 15-year-old boys in England.

Vancouver, British Columbia, is farther north than the city of Quebec.

Have Made Early Start

Survey Party Of Geologists On Way To Northern Location

The year's first survey party of geologists to hunt for new mineral deposits which would help Canada's war effort is already on its way to the Northwest Territories.

It is headed for a location north of Yellowknife and the unusually early start has been made because the party may reach its destination before the spring breakup, thereby gaining more than two weeks in the field.

The party is headed by A. W. Jolliffe, geologist of the department of mines and resources and is the first of more than 50 parties which will go out across Canada as soon as warm weather sets in. Department spokesmen declined to make public the mineral outcroppings that has taken Mr. Jolliffe and his associates north at so early a date but admitted if the geologist found favorable indications there a development would follow the forced sending of considerable assistance in wartime production, particularly of steel.

Not To Be Believed

Good Story About Norwegian Fisherman And Two Nazis

News of Norway says the inhabitants of a small fishing village in one of the fjords of Western Norway recently witnessed the forced landing of an airplane a few hundred yards from shore. One of the local fishermen set out by rowboat to rescue two pilots who were foundering in the water.

A crowd on shore watched the fishermen pick up the two airmen and start for land. But suddenly he pulled his oars in, grappled with the two men and threw them overboard. When he reached shore the sheriff questioned him.

"Why in blazes did you throw those men into the fjord?"

"They turned out to be German. First thought they were British."

"Did you know them? Haven't they alive when you tossed them overboard?"

"Well, one of them said he was alive, but you know how these Nazis lie..."

SELECTED RECIPES

CRUMB PIE SHELL

- 1 cup butter
- 1 cup sugar
- 1 cup fine corn flake crumbs
- Melt butter in pie pan, add sugar and crumbs; mix thoroughly. Press into crust of pie pan, cover sides and bottom of pan. Chill before adding filling.
- *Roll or grind 4 cups Kellogg's corn flakes to yield 1 cup fine crumbs.

Lemon Chiffon Pie With Crumb Shell

- 1 crumb pie shell
- 1 teaspoon gelatin
- 1 cup cold water
- 1 cup lemon juice
- 1 teaspoon salt
- 1 cup sugar
- 1 teaspoon grated lemon rind
- 1 cup lemon juice
- 1 teaspoon salt
- 1 cup sugar

Prepare crumb pie shell; chill. (See below.) Soak gelatin in water. Beat egg yolks slightly in top of double boiler; add lemon rind, lemon juice, salt and half the sugar; stir and cook over hot water until, of custard consistency. Add soaked gelatin and stir until well custard coats. When mixture begins to coagulate, add stiffly beaten egg whites to which other half of sugar has been added. Pour into crumb pie shell and chill in refrigerator one hour or until filling is firm enough to cut.

Yield: One 9-inch pie.

TOMATO RAREBIT

- 1 lb Canadian cheese
- 1 teaspoon dry mustard
- 1 teaspoon pepper
- 3 cups drained, canned tomatoes
- Salt
- 6 Holland Rusk

Put the upper section of a double boiler pot and pieces cheese and mustard, add tomato pulp and salt to taste. Stir until smooth and creamy and serve on rusk. Six portions.

Large Number Traced

Annually, 25,000 persons disappear in England. Of this number, 4,200 disappear from London alone. Police records over a period of 10 years show that only about 2,000 never are traced.

Chile Is Large Country

Chile, if placed on the west coast of North America, would reach from Sitka, Alaska, to a point opposite Mexico City. The country is 90 to 200 miles wide and 2,600 miles long.

Ontario mines produced gold and silver valued at \$109,508,900 in 1939.

Feel that surface

It's dry and safe—looks smoother—
—Isn't oily, sticky or unsound.

You can tell with the flip of your fingers that the new O-Cedar polishes better and easier.

The new O-Cedar polishes leaves a soft, warm, lustrous finish that feels dry—Isn't oily, greasy or greasy. Doesn't smudge dust as do most surfaces.

Increase Is Necessary

Bureau Of Statistics Sees Need For Higher Milk Production

Necessity for increased milk production this year to supply the great quantities of dairy products needed for export to the United Kingdom and to take care of the large domestic consumption of butter consequent on greater employment" was seen by the Dominion bureau of statistics.

Feathers of a bird, instead of covering the entire body, occupy restricted areas and only lap over the bare patches.

Germany is salvaging old tin cans and drastically limiting the use of tin generally.

Use Of Aluminum

Restriction Has Been Placed On Non-War Consumption

Restrictions placed on civil use of aluminum have reduced non-war consumption from about 1,000 tons monthly to less than 25 tons, Munitions Minister Howe announced.

Use of aluminum for hollowware, electrical conductors, foil, and other domestic purposes was banned some time ago and imports were strictly controlled to divert maximum supplies of the metal to manufacture of aircraft and other war needs.

Mr. Howe said supplies of all metals essential to the war effort are being "safeguarded." George C. Baleman is controller of non-ferrous metals and H. D. Scully is steel controller.

NO TEMPORARY RELIEF FOR ME...I'M THROUG WITH CONSTIPATION!

Yes, thousands of people suffering from constipation due to lack of the right kind of "bulk" in their diet have been able to use the same thing. For now there is a sensible way to correct this condition... and for better than laxatives. It's only one temporary relief.

If you suffer from common trouble, try eating delicious KELLOGG'S ALL-BRAN every morning. It contains the necessary "bulk" to help you become "regular"...

Why not do this: Get your KELLOGG'S ALL-BRAN daily... drink plenty of water... and for better than laxatives. It's only one temporary relief.

If you suffer from common trouble, try eating delicious KELLOGG'S ALL-BRAN every morning. It contains the necessary "bulk" to help you become "regular"...

A Message FROM THE WAR SAVINGS
COMMITTEE, OTTAWA

But the need for weapons of war grows ever more urgent, as the Nazi threat spreads wider over the world.

Invest in War Savings Certificates the dollars you don't need to spend. After Victory, they come back to you with interest. Spend less NOW so that you can spend more THEN, when labour and materials will be available for the things you need. There is no price too high for freedom.

RURAL SAVINGS PLAN—Farmers receiving regular payments from marketing outlets can authorize regular deductions of any amount from their cheques. If delivering grain to an elevator, authorize it to issue a cash ticket in the largest possible multiple of \$4 in favor of The Receiver General of Canada, for the purchase of War Savings Certificates, to be registered in your name and mailed you direct.

SPEND LESS—TO BUY MORE WAR SAVINGS CERTIFICATES

Toboggan work, field craft and camouflaging and wood craft will be among the subjects to be included in ski and snowshoe training for troops in Canada during the coming winter, according to preparations underway by the directorate of military training. Under the command of some of Canada's best known ski experts, a winter training school will be established in November.

Dr. L. H. Newman, the Dominion cerealists announces that our millers and bakers will soon be turning out a flour and bread that will be rich in B vitamins that are present in the

These new loaves, which are already being manufactured experimentally at Montreal and Toronto, were distributed at a number of C. G. T. U. Plan field days held recently in Manitoba, Saskatchewan and Alberta. Hundreds of people, including a number of ladies, examined and tasted the new bread, they declared unanimously that the new loaf was

pect to wheat that farm incomes need to be adjusted, for wheat is an important commodity in Canada which is still selling on a basis of depressed prices. It is the wheat farmer whose behalf adjustment is most urgently required, and those farmers who have also other lines of production require adjustment in respect of their wheat operations.

"For such reasons the Board of Directors of United Grain Growers Limited advocates that there should be paid each wheat farmer a bonus on his wheat acreage. It should be applied not on the acreage actually sown with wheat in 1941 but on what was sown as his basic wheat acreage in 1934.
